

7 Steps to Radiant Skin! - The Medical Skin Care Guide The Marketing Execs Dont Want You To Read

In this easy-to-follow book, you will learn seven steps that will make your skin more beautiful and lustrous than you ever thought possible. The best thing is, you will not have to spend insane amounts of money on luxury products that supposedly offer miraculous results. Instead, you get to learn how your skin works and what makes it look better. In the end, you will be able to achieve great, long lasting results with medically active skin care. I have worked in the medical aesthetic industry for close to a decade, having spent the bulk of my career in various clinical roles at Allergan, the makers of BOTOX and JUVEDERM. As an aesthetic practitioner, I thoroughly enjoy creating outstanding results for my patients with lasers, BOTOX and dermal fillers. People generally come in to the clinic because they want to look their absolute best. This often results in a big boost in confidence as well. Medically-based skin care is a part of my practice that I could not live without. You simply MUST use active ingredients to get the results you want. What I've noticed with every single patient, male or female, is an astounding amount of money being spent on ineffective skin care. When I ask my clients why they purchase these skin care items, their overwhelming answer is the marketing. I have written this book to dispel these myths; you need education and empowerment to make good decisions about your skin care and I hope I have provided it for you here.
