

A Comprehensive Guide to Sign Language Interpreting in Europe, 2012 edition

Sign Language Interpreting in Europe gives an overview of the organizations, training programs, registries, sign language recognition, and the employment situations of Sign Language interpreters in 40 European regions & countries. Both qualitative and quantitative survey data serve as a basis for an in-depth analysis of the current state of affairs as well as future trends. The fourth such survey held in twelve years, the 2012 edition also lists data from previous surveys in order to visualize long-term changes in the field. In addition, this data allows you to make at-a-glance comparisons between individual countries. Sign Language Interpreting in Europe is based on a 2012 survey that was held among 40 national and regional organizations of Sign Language interpreters in 35 European countries. The findings of the survey were supplemented with information found in several media publications on Sign Language Interpreting throughout Europe. For each sold publication 10% of the proceeds will be donated to the European Forum of Sign Language Interpreters (efsli).
