

The Preppers Apocalypse Survival Guide to Bugging In & Home Defense The Preppers Apocalypse Survival Guide book series by Steve Rayder is quickly growing in popularity in the prepping community. With thousands of copies being read by preppers around the world within months of the release of the very first book. This latest installment in the series covers the topic of bugging in and home defense, raising many thought provoking issues you may well have overlooked. Steve has looked into the history of mankind to discover how humanity would react to a widespread disaster scenario and put that knowledge to good use in this book. If you are of the opinion that you would bug out in the event of a disaster, you need to read this book. There loads of great information as to why bugging out may be a far more dangerous and risky strategy than you may think. I think this book will change the mind of many people in the prepping and disaster preparedness community who think leaving their homes and heading into the woods is the best course of action.
