

Student CD for Go! All in One: Computer Concepts and Applications

The primary goal of the GO! Series, aside from teaching computer applications, is ease of implementation, with an approach that is based on clearly defined projects for students and a one-of-a-kind supplements package. Why should you consider GO! All In One: Computer Concepts and Applications ? Because it teaches computer concepts and applications together - the way it is in the real world! It engages students right away by focusing on jobs and incorporating Web 2.0 apps in a logical way. Take a look at GO! All In One and learn how you can put concepts into action through this unique, jobs-focused approach that integrates computer concepts and applications into practical combinations of concepts and skills in the context of a job. With this approach students learn how to work in the real world where they will solve problems using computer concepts and skills related to the Internet, Microsoft Office applications, collaboration, social media, and cloud computing.
