

Assisting Individuals with Down Syndrome to Access Information Technology: Overview Pt. 1 (Down Syndrome Issues & Information)

As the impact of computer and communications technology upon our lives continues to increase, so the ability to control and interact with these technologies becomes more important for everyday living and working. This module provides an overview of issues relating to the use of information technology by people with Down syndrome. It aims to provide a general introduction to these issues for parents, teachers and employers. Accessibility issues are discussed and practical strategies for adapting standard equipment and software are listed. Potential benefits of computer assisted learning applications are summarised (further detail can be found in DSii-16-09). Finally, some of the resources related to Down syndrome that are available via the Internet are discussed.
