

Astral Projection, Out of Body Experiences (OBEs) and Near Death Experiences (NDEs): Research, Study and Reflection with a Christian Perspective by Robert Alan King is a book with over 5,600 words. After several decades of study on psychic phenomena, the occult and its relevance to religion, King provides Christians with a balanced and thorough analysis of the out of body experience. In his twenties, he was personally involved with mysticism and experienced numerous out-of-body experiences himself so he is writing this both as a researcher and as somebody who has been there. Not only was he fully conscious in his experiences, but also was absolutely convinced at the time that he was out of his body. King has strived to remain unbiased as much as possible in this study and analysis of the facts in order to provide the evidence as it stands and allow the reader to come to their own conclusions on the matter. This book takes into account scientific research and biological factors to better understand the possibilities about what may be happening in many out of body experiences. Drawing on an extensive amount of research over the last few decades, it clearly shows how out of body experiences are unreliable for an understanding of objective reality in the spiritual realms. King's conclusion directs the reader back to the Bible as the only certain foundation of spiritual truth. It also touches briefly on possible accounts of out of body experiences in the Bible.
