

Citizenship and Exclusion

Citizenship implies exclusion of non-members. In a world of gross inequalities, poverty and forced migration citizenship in rich and safe Northern states increasingly is a privilege and the exclusion of billions of desperately poor and uprooted is a moral scandal. In *Citizenship and Exclusion* distinguished moral and political philosophers, historians, sociologists, anthropologists and political scientists from America, Australia and Europe try to understand these complex problems in a comparative and interdisciplinary way. They criticize existing institutions and policies and look for alternatives more in line with principles and constitutions of liberal democratic welfare states, like permissive refugee and asylum policies, fair immigration policies, easy naturalization, and multiethnic and transnational concepts and practices of citizenship.
