

The Plot Against Asthma and Allergy Patients: Asthma, Allergies, Migraine, Chronic Fatigue Syndrome are Curable, but the Cure is Hidden from the Patients

Dr. Ravikovich describes his clinical experience with histamine a synthetic version of the bodys substance that stimulates the body to heal itself. His histamine therapy freed hundreds of asthma, allergy and migraine sufferers from drugs that have disastrous effects on the patients health and the course of the diseases for which these drugs are prescribed. Unlike other books that concentrate on triggers, this book spells out the primary cellular and genetic defects in patients with allergies, asthma and related diseases and shows how to repair these defects. The author substantiates this through the theoretical works of the worlds leading scientists. Dr. Ravikovich undertook extensive detective search of literature in molecular biology, immunopharmacology, genetics, and clinical medicine that led him to unprecedented revelations. The scientific foundation for the treatment that could save millions from suffering and dying has been concealed by the medical elite to enable the pharmaceutical industry to develop only those drugs that do not cure and ensure indefinite patient dependence.
